## **Hidden Faces**

*In essence, while mask-wearing is no longer mandatory after the pandemic, it remains a visible part of Tokyo's metro scene, reflecting a blend of personal choice and cultural considerations. Each mask tells a story, a silent narrative woven into the fabric of daily life. Behind the masks, complex thoughts resonate.*

*I, a solitary observer, stood pressed against a support pillar, and thought masks may hide their faces, but they cannot conceal the essence of their humanity.*

*Intrigued by the scenery, I revisited the station, my camera poised to document daily life.*
